Costain is committed to operating a fully competent workforce on all contracts and offices.

All management and supervisory staff, whether employed by Costain or by our supply chain must be able to demonstrate competence in appropriate management, supervisory or technical skills and health and safety matters.

Costain will provide advice and guidance to enable compliance with this policy, which will be subject to regular independent audits.

The Competency Card system provides the mechanism for verifying this competence and as such, all members of our workforce are required to hold the appropriate card. This means that:

- All operational staff that have a specific skill / trade are required to hold a relevant competence card
- All office and non-construction/ operational staff must hold a Costain Visitor card.

100% of the workforce working for Costain should fall into one of the following categories and all personnel should progress to reach category A:

**Category A** – Hold the appropriate' competence card for their role including the Costain Visitors card.

**Category B** – Hold a competence card, or recognised equivalent not specified for role, this includes individuals holding a trainee or experienced worker card who are registered for an NVQ or undertaking professional competence assessment

**Category C** – Have passed the relevant H&S Test and applied for their specified competence card and be able to provide written proof.

**Category D** – Have booked the relevant H&S Test but not yet passed. Verification of competence required, by issue of a Costain Permit to Work ([SHE-T-271](#)), valid for three weeks and not renewable, before work can commence.

**Note:** – individuals must have a relevant card, from the list, for the trade they are undertaking the majority of the time while on site.
